## Scorm Compliant LMS With YAF Forum And Industry Newsfeed

## Client Profile

Client is a global Healthcare eLearning Company based in the US. Their strong list of clientele includes medical devices and healthcare equipment manufacturers, who catered to medical industry with hardware and software to ease the learning transition.

Purpose Of The LMS Was To Encourage Social And Blended Learning To Educate, Evaluate, Share, Discuss And Certify 16000 Spine Surgeons, 3000 Publishers And Approximately 250 Manufacturers

## Business Scenario

The Client required an easy to access Learning Management System (LMS) with single collaboration platform for publishers, spine surgeons and healthcare manufacturers. It is used to update and publish courseware material for Spine surgeons. The purpose of the LMS was to encourage social and blended learning to educate, evaluate, share, discuss and certify 16000 spine surgeons, 3000 publishers and approximately 250 manufacturers to stay updated with latest information and events of spine surgeon's field.

### They required a software with:

- Incorporated Continuous Medical Education (CME) courses and certifications
- Competence to add audio, video, text and animation content
- Visually and mentally engaging learning experience
- Version control provision
- Embedded content of FDA approved Spine Surgical Techniques
- Tool for education evaluation process and certification
