CLIENT PROFILE

The client is an Indian banking company incorporated in year 1997. Initially registered as a non-banking financial company later became a public financial institution. It has five subsidiaries.

The bank serves a diverse range of private and corporate customers in India that includes infrastructure sector, services to self-employed and rural areas.

BUSINESS CHALLENGES

Considering the huge customer base and enormous data generated involving a wide range of data systems, the client company confronted numerous business challenges.

- Multiple data sources and data formats with multiple file extensions
- Erroneous as well as missing data in all the source files
- No centralized data source
- Same customer transaction capturing in multiple source systems
- One of the biggest challenge due to multiple source systems is the daily reconciliation of transactions at organization level

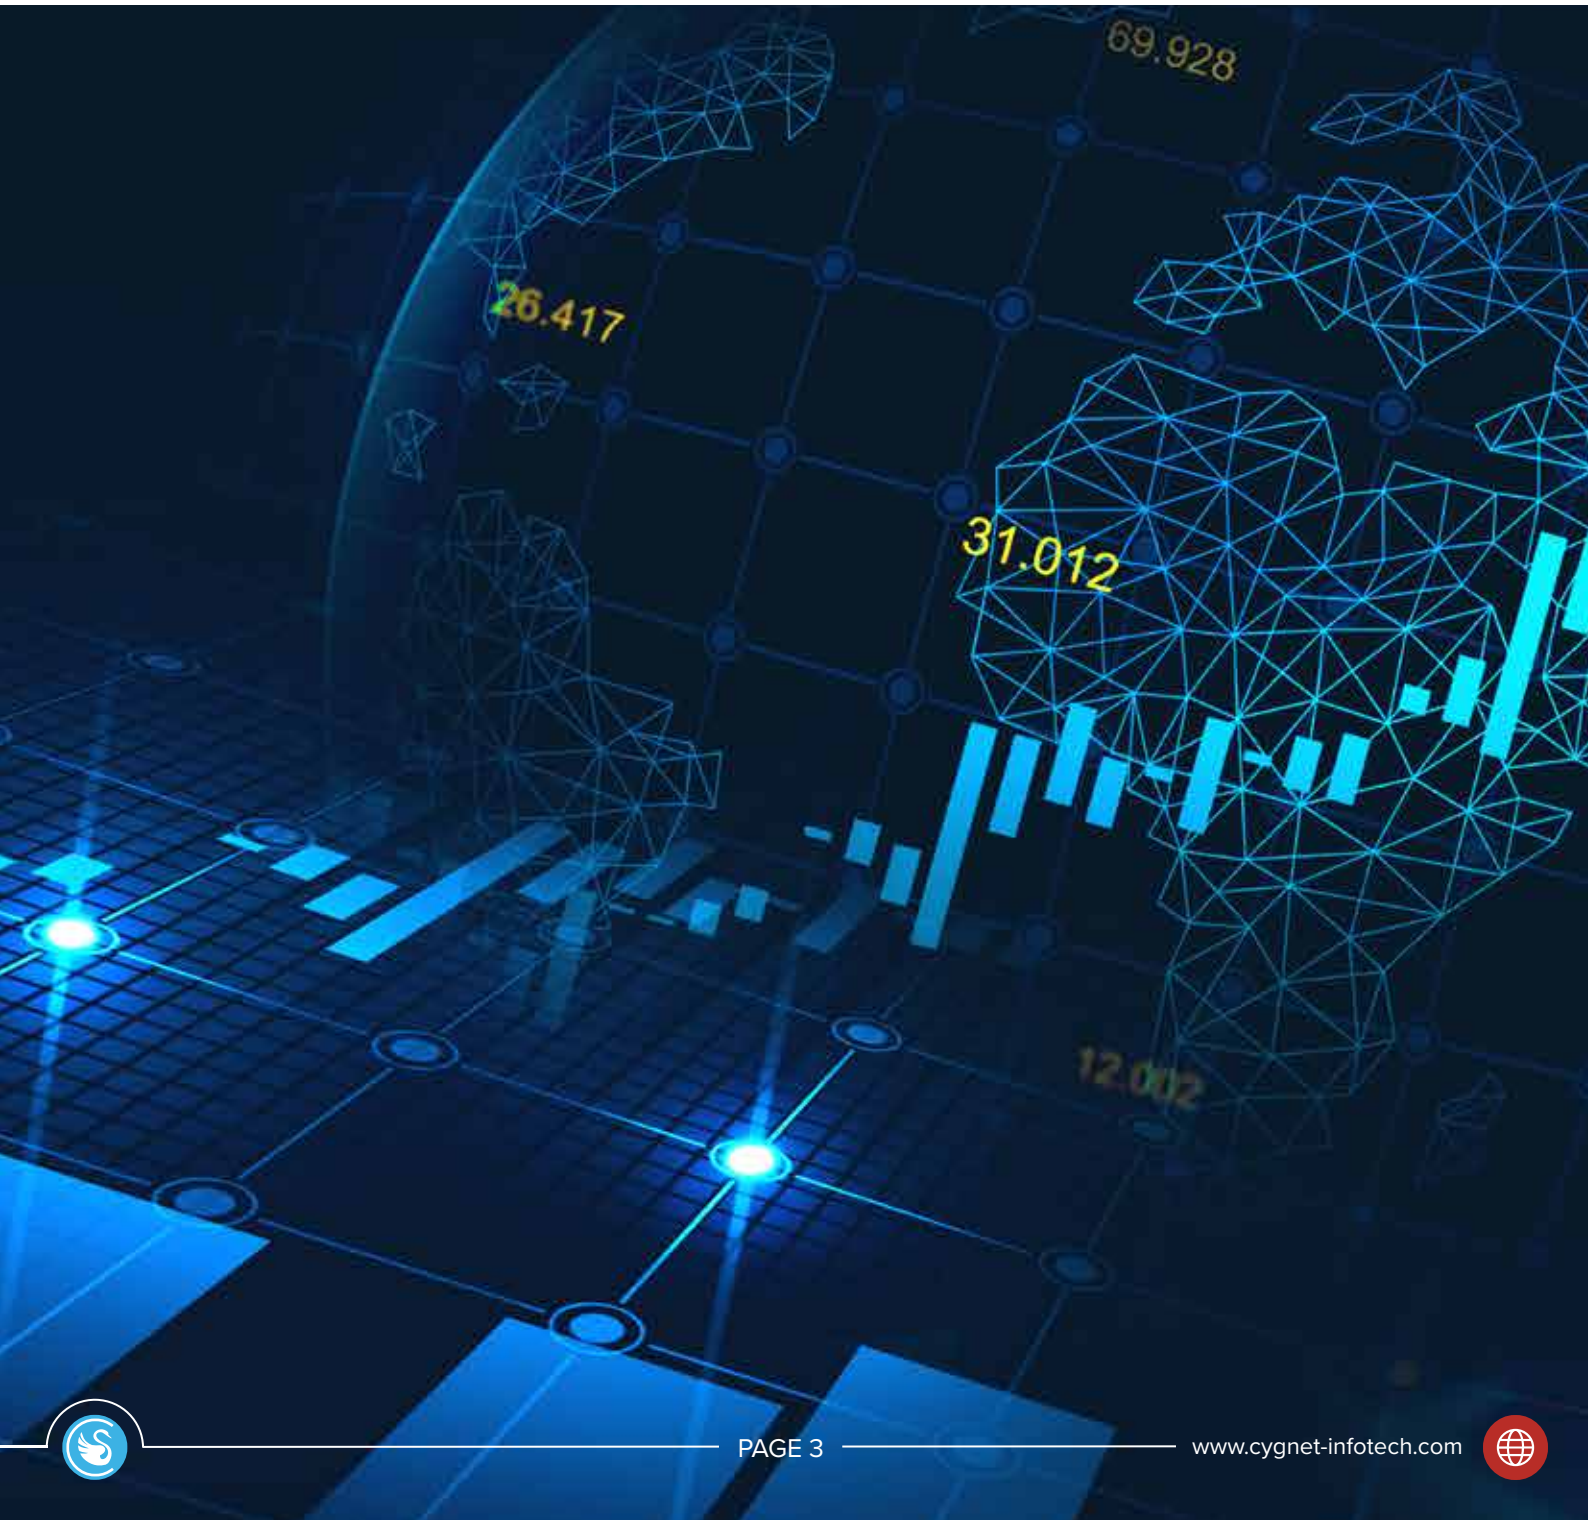

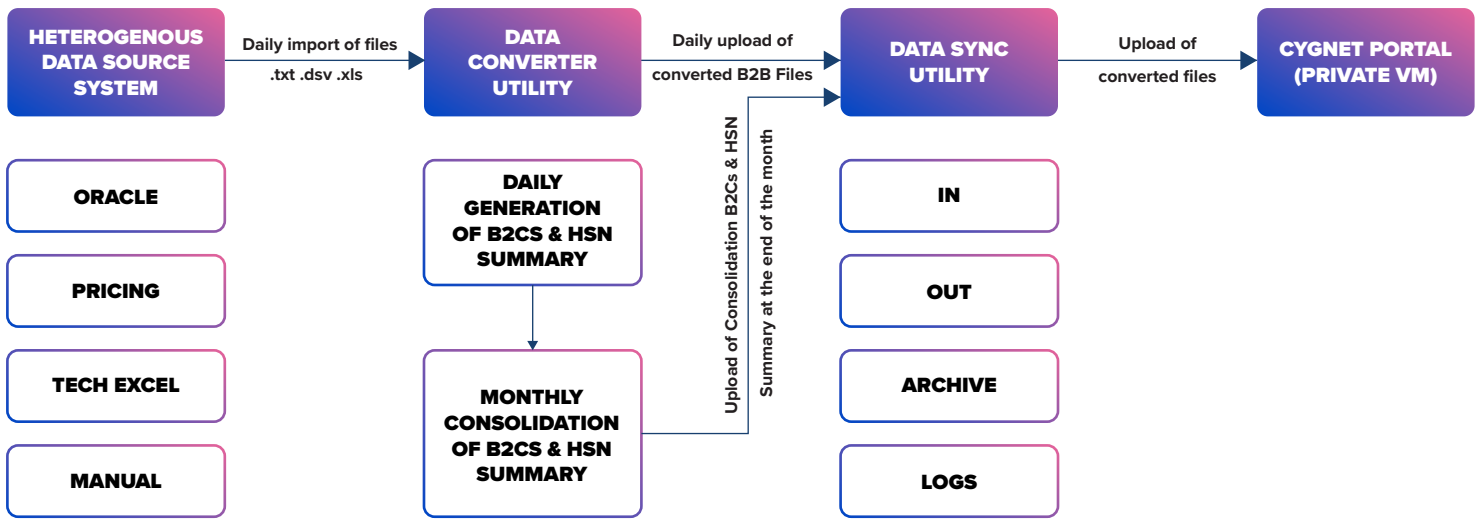

CYGNET'S SOLUTION

Considering the above-mentioned challenges, technical and domain experts at Cygnet deployed a data converter utility.

- Utility helped to convert data from multiple source systems into Cygnet format
- Built logics and validations in the data converter utility to calculate missing data such as:
 - Invoice Value
 - Taxable Value
 - HSN Code & Description
- Provided daily auto-mated upload transactions to Cygnet portal
- Provided a customized solution of storing the B2Cs & HSN Summaries generated daily in a separate folder and consolidating the same at the end of the month
- Add-on feature of sending mail notification to the team for the files received for processing on each day

DATA CONVERTER UTILITY

ABOUT CYGNET
